PORTFOLIO: <https://dulcet-profitrole-181896.netlify.app/>

Email: tcsujin99@gmail.com

- Seeking a Junior Full Stack Developer role in the IT industry with a focus on the MERN stack. Eager to apply recent graduate skills in HTML, CSS, JavaScript, React.js, Node.js, and MongoDB. Dedicated to collaborating with experienced developers to develop responsive web applications. Committed to learning and adapting to emerging technologies while contributing to team projects. Ready to leverage problem-solving abilities and proactive attitude to drive project success.

SKILLS

- Frontend Technologies: HTML- CSS- Bootstrap-ReactJS.
- Backend Technologies: NodeJS-ExpressJS.
- Database: MongoDB-MySql.

PROJECTS

E-Commerce Website(FULL STACK PROJECT)

<https://demofrontecommerce.vercel.app/>

- I developed an e-commerce app using the MERN stack, featuring user authentication, product listings, shopping cart, and secure checkout with PayPal and Stripe integration.
- The frontend is built with React, while the backend utilizes Node.js, Express, and MongoDB for data handling.

Social Media Website(Full Stack Project)

<https://sparkling-taffy-4a36b0.netlify.app/>

I created a social media app using the MERN stack, featuring real-time chat, photo sharing, and user authentication with JWT. The app's frontend is built with React, while the backend leverages Node.js, Express, and MongoDB for data management.

Food Landing Page

<https://funny-gingersnap-23b1f1.netlify.app/>

- A visually stunning webpage showcasing diverse cuisines, enticing food images, and intuitive navigation for hungry visitors to explore.
- An inventory management website efficiently tracks, organizes, and updates inventory levels for businesses.
- It streamlines operations by providing real-time insights, enhancing inventory control.

Inventory Management Website(Full Stack Project)

<https://resilient-cassata-615ff1.netlify.app/>

- An inventory management website efficiently tracks, organizes, and updates inventory levels for businesses.
- It streamlines operations by providing real-time insights, enhancing inventory control.

Travel Landing Page

<https://curious-bunny-de6c83.netlify.app/>

- I designed a travel landing page using HTML, CSS, and JavaScript, featuring a responsive layout, interactive elements, and smooth scrolling.
- The page includes stunning visuals, destination highlights, and a user-friendly navigation menu to enhance user experience.

Chat app(Full Stack Project)

<https://chatfront-omega.vercel.app/>

- I created a chat app using the MERN stack, featuring real-time messaging, user authentication, and customizable chat rooms.
- The frontend is built with React, while the backend uses Node.js, Express, and MongoDB for data management.

Notes app(React-Redux)

<https://sparkly-unicorn-c40eef.netlify.app/>

- A robust notes application powered by React and Redux, offering state management capabilities, advanced data handling, and seamless synchronization across devices for a seamless note-taking experience.

Hall Booking API(NodeJS)

<https://github.com/sujintc/Newhallbookingtask.git>

- A comprehensive platform facilitating hassle-free hall bookings for various events, featuring intuitive search filters, and interactive for users to select their preferred rooms.

Mentor-Student Assingment Task(NodeJS)

<https://github.com/sujintc/MentorStudentTask.git>

- A Mentor-student Assignment system connecting mentors and students, offering features such choosing mentors and students and viewing it.

Password Reset Task(NodeJS)

<https://github.com/sujintc/passwordbackend1.git>

- A secure and user-friendly interface enabling users to easily reset their passwords, featuring multi-factor authentication options, step-by-step guidance, and robust security measures for account protection.
